

Do HAKKO or CHP products contain any materials that come from conflict regions?

Based on the knowledge we have to date and information we have been able to obtain from suppliers, American Hakko is confident that the HAKKO and CHP products we provide to the market do not contain Conflict Materials that originate from the DRC Conflict Regions.

Note that HAKKO and CHP products are used in the manufacturing of other products and not components or parts themselves and therefore are considered out-of-scope from Section 1502 of the Dodd-Frank Act.
