

American Hakko Products, Inc.

General Certificate of Conformance

American Hakko Products, Inc. hereby certifies that all HAKKO and CHP brand products and parts have been manufactured in accordance with all applicable work instructions, drawing, and specifications, and meet applicable industry standards. HAKKO and CHP brand products and parts undergo regular quality inspections during production to ensure consistency in quality and performance to published specifications, and:

- Where applicable, HAKKO and CHP brand products are independently tested for certification to product safety standards as identified by the marking on the products identification label.
- Where products are marked as ESD SAFE or designed for static control, those products meet the applicable requirements for use in ESD Protected Areas as defined in ANSI/ESD S20.20-2014.
- Soldering, Desoldering, and Rework products meet the applicable recommendations as defined by the most recent version of IPC J-STD-001.
- All HAKKO and CHP brand products and parts are in compliance with EC 1907/2006 and have no Substances of Very High Concern (SVHC) present exceeding the established threshold limits, as listed on the most recently published candidate list provided by the European Chemicals Agency (ECHA).
- Current HAKKO products, excluding items 485-V12, 485-1-V12 and 485-46, are manufactured in compliance with EU RoHS Directives 2002/95/EC – 2011/65/EU and the Council of 8 June 2011 on the Restriction of Hazardous Substances (RoHS and RoHS2 Directives) and that the applicable substances are not contained within the product above the established threshold level.
- Note that all HAKKO and CHP brand products and parts are determined to be out of scope for reporting of Conflict Materials as per Section 1502 of the Dodd-Frank Act.
