# 

# Instruction Manual

Thank you for purchasing the HAKKO FX-888D soldering station Please read this manual before operating the HAKKO FX-888D. Keep this manual readily accessible for reference

# 1. PACKING LIST AND PART NAMES Please check to make sure that all items listed below are included in the package.

\*HAKKO FX-8802 / FX-8803 / FX-8804 (not included) can be connected to HAKKO FX-888D station. \*When using the HAKKO FX-8802 / FX-8803 / FX-8804, please use it with the applicable iron holder

# 2. SPECIFICATIONS

**MAK** 

Power consumption	70W	HAKKO FX-8801 Soldering iron	
<ul> <li>Station</li> </ul>		Power consumption	AC26V 65W
Output	AC26V	Tip to ground resistance	<2Ω
Temperature range	50 - 480°C (120 - 899°F)	Tip to ground potential	< 2 mV
Temperature stability	±1°C (±1.8°F) at idle temperature	Heating element	Ceramic heater
	{When set to 200-480°C (400-899°F)}	Cord	1.2m (3.9 ft.)
Dimensions (W × H × D)	100(W) × 120(H) × 120(D) mm	Total length (w/o cord)	217mm (8.5 in.) with B tip
	(3.9 × 4.7 × 4.7 in.)	Weight (w/o cord)	46g (0.10 lb. / 1.62 oz.) with B tip
Weight (w/o cord)	1.2kg (2.6 lb.)		

\* The temperature was measured using the FG-100 thermometer. \* Specifications and design are subject to charge without notice. \* This product is protected against electrostatic discharge

#### **A** CAUTION

- Handling precautions for ESD Safe products
- This product contains electrostatic countermeasures, so please use the following precautions: 1. Not all plastic parts are insulators, they may be conductive. Be careful not to expose live electrical parts or damage insulating materials when performing repairs or replacing parts. 2. Be sure to ground the product before use.
- 各言語(日本語、英語、中国語、フランス語、ドイツ語、韓国語)の取扱説明書は以下の URL、HAKKO Document Portal からダウンロードしてご覧いただけます。 (商品によっては設定の無い言語がありますが、ご了承ください。)
- 各國語言(日語、英語、中文、法語、德語、韓語)的使用説明書可以通過以下网站的 HAKKO Document Portal 下載參閱 (有一部分的產品沒有設定外語對應、請見諒)
- Instruction manual in the language of Japanese, English, Chinese, French, German, and Korean can be downloaded from the HAKKO Document Portal.
- (Please note that some languages may not be available depending on the product.)

# **3. WARNINGS, CAUTIONS AND NOTES**

Warnings, cautions and notes are placed at critical points in this manual to direct the operator's attention to significant items. They are defined as follows:

MARNING: Failure to comply with a WARNING may result in serious injury or death

A CAUTION : Failure to comply with a CAUTION may result in injury to the operator, or damage to the items involved.

# 

When power is ON, tip temperatures will be between 50 and 480°C. (120 to 899°F) To avoid injury or damage to personnel and items in the work area, observe the following:

- Do not touch the tip or the metal parts near the tip.
- Do not allow the tip to come close to, or touch, flammable materials.
- Inform others in the area that the unit is hot and should not be touched. Turn the power off when not in use, or left unattended
- Turn the power off when changing parts or storing the HAKKO FX-888D.
- This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved.
- Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.
- If the power cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified person in order to avoid personal injury or damage to the unit.
- The unit is for a counter or workbench use only.
- To prevent accidents or damage to the HAKKO FX-888D, be sure to observe the following:
- Do not use the HAKKO FX-888D for applications other than soldering.
- Do not strike the iron against hard objects to remove excess solder. This will damage the iron.
- Do not modify the HAKKO FX-888D.
- Use only genuine HAKKO replacement parts.
- Do not allow the HAKKO FX-888D to become wet, or use it with wet hands.
- Remove power and iron cords by holding the plug. not the wires. Be sure the work area is well ventilated. Soldering produces smoke.
- While using the HAKKO FX-888D, don't do anything which may cause bodily harm or physical damage.

Small sno

Push on the plug until

securely connected

**≜**CAUTION

This tool must be placed on

its stand when not in use.

it stops, making sure it is

0

To disconnect, hold the plug

and pull it out of the receptacle

# **4. INITIAL SETUP**

### A. Setup the iron holder

- 1. Fit the small sponge pieces into the hollows of the iron holder base. 2. Add an appropriate amount of water into the iron
- holder base. The small sponge will absorb water and help keep the large sponge damp at all times. 3. Dampen the large sponge and place it on the
- iron holder base.

### 

Be sure the sponge is moistened with water before use to avoid damaging the tip.

#### \*When using a Cleaning Wire

Place it in the iron holder as shown on the right. See "2.Using a Cleaning Wire" in section "7. MAINTENANCE"

### B. Connect the iron to the station

- 1. Connect the cord assembly to the receptacle
- 2. Place the iron into the iron holder. 3. Plug the power cord into an appropriate power supply

#### 

Be sure to turn off the power before connecting or disconnecting the cord assembly for the iron to and from the receptacle to avoid damaging the circuit board.

Do not use any iron other than those listed in

- Section 1 of this manual. Doing so may result in inadequate performance and / or possible damage
- to the unit

The unit is protected against electrostatic discharge and must be grounded for full efficiency.

# 5. OPERATION

 Operation and indication Switch and control button

2021.12

80.0956

MA02469XZ211210

The front panel for the HAKKO FX-888D has the following two control buttons

- Use this button to select and change settings.
  - In the temperature preset mode, pressing this button will change the selected preset temperature while the unit is in operation.
- Pressing and holding the button will start the adjustment mode. ENTER
- -Use this button to make and confirm selections.
- Pressing this button will display the current set temperature.
- Pressing and holding the button will start the temperature setting mode.

# 5. OPERATION

## A. Turn on the power switch

# 

B. After use

## A. Changing the set temperature

Example : Changing from 350°C to 400°C

# B. The preset mode

Initial preset temperatures ₽ | : 250°C (482°F) P2 P3 : 300°C (572°F) : 350°C (662°F) РŸ : 400°C (752°F) **PS** : 450°C (842°F)

The initial number of active presets is set to 5 at the factory The default selected preset is set to P3 at the factory.

Example : Changing preset temperature from preset No.1(250°C) to No.3(350°C)

Heater control will begin with new preset temperature.

The procedure for making changes to the preset temperatures is the same as changing the set temperature

Enter the parameter setting to change the mode. (Please refer to [6. PARAMETER SETTING])

## After turning on the power switch, **After** will be displayed for two seconds, and current temperature will be displayed. When the display stabilizes, the LED heater lamp will begin to flash

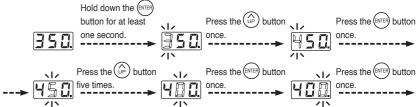

Place the iron in the iron holder when not in use. Turn the power off when the HAKKO FX-888D is not in use for an extended period.

Always clean the tip and coat it with fresh solder after use.

## Making Changes to Settings

If no buttons are pressed for at least one minute during the process of changing settings of the unit. the system will exit and return to operating mode and display the current temperature.

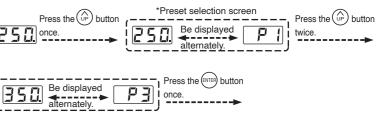

The temperature setting range is from 50 to 480°C. (from 120 to 899°F) By default, the temperature is set to 350°C. (662°F)

The desired temperature is saved to the system memory.

Heater control will begin after the new set temperature is displayed.

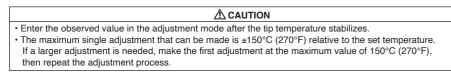

The HAKKO FX-888D has a preset mode that will allow the unit to store up to 5 preset temperatures you can change between instead of using the above normal mode.

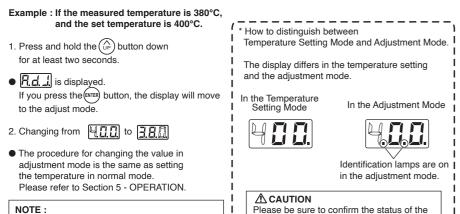

# 5. OPERATION

#### C. Performing the temperature adjustment

When replacing the iron, heater or tip, a temperature adjustment may be required. Use adjustment mode to perform the temperature adjustment.

During adjustment mode, the hundreds digit will accept values from 0 through 6 if the temperature is set to display in °C, or the values 0 through 9 if the temperature is set to display in °F.

3. Press the ENTER button to exit the setting after changing the values.

• The tip temperature will be adjusted accordingly.

## D. Restriction on setting changes (Password function)

It is possible to restrict certain setting changes to the unit. There are three choices for the password setting. (The factory default is "0 : Open")

	0 : Open	1 : Partial	2 : Restricted
Move to the parameter setting mode	0	×	×
Move to the temperature setting mode	0	$\bigtriangleup$	×
Move to the preset selection mode	0	$\triangle$	×
Move to the adjust mode	0	$\bigtriangleup$	×

O : You can make changes without entering a password.

riangle : You can choose whether or not a password is needed to make changes

× : A password is required to make changes.

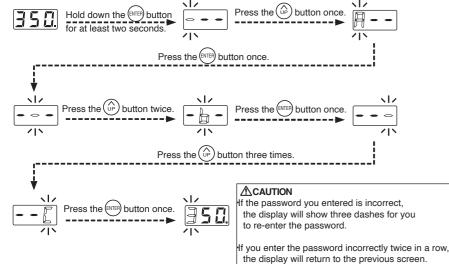

Select and input three letters for password from six letters on the right.

identification lamps so that you do not enter

a value in the wrong mode.

Example: The procedure for changing the set temperature when the unit is restricted by a password. (Password is "AbC")

The unit will move to the change setting screen for each mode after entering the password. Please change the setting for each mode according to the procedure. (In the above example, please refer to the procedure for setting the temperature.)

# 6. PARAMETER SETTING

#### The FX-888D has the following parameters.

	•		
Parameter name	Parameter No.	Value	Initial valu
°C/F selection	01	°C / °F	°F
Low temperature error setting	03	54~270°F (30~150°C)	270°F
Setting mode selection	11	0: The normal mode /1: The preset mode	0
The number of preset *		2P (2 pcs) ~ 5P (5 pcs)	5 <i>P</i>
Password setting	14	0: Open /1: Partial /2: Restricted	0
Temperature setting mode **		10:0 / 11:x	11
Preset selection mode **		20:0 / 21:×	2 0
Adjust mode **		×:  E / O:[] E	31
Password ***		R L L E F Select three letters	-

\*It is displayed only when "1:Preset mode" is selected in the setting mode

\*\*It is displayed only when "1:Custom" is selected in the password setting.

\*\*\*It is displayed only when either "1:Custom" or "2:valid" is selected in the password setting.

The HAKKO FX-888D has the following four parameters. Turn the power on while pressing the  $\left( \stackrel{\frown}{}_{UP} \right)$  button. Perform the setting to select the desired parameter No..

Press the  $\left( \stackrel{\frown}{}_{UP} \right)$  button to change the values, and press the ENTER button to execute

#### • $\square$ : °C or °F temperature display seletion The displayed temperature can be switched between Celsius and Fahrenheit

## $\bullet$ $\square$ $\exists$ : Low temperature error setting

If the sensor temperature goes below the low-limit temperature although heating element is on, an error will be displayed

#### • { : Setting mode selection

Temperature setting can be switched between the normal mode and the preset mode. If selecting the preset mode, you will be asked for the number of preset you required. 

## ● {\\ Password setting

Select "Open", "Partial" or "Restricted" for password setting. If selecting the Restricted, perform the setting for password. If selecting the partial, choose whether or not the password function is needed when moving to the temperature setting mode, the preset mode and the adjust mode and set the password.

#### Parameter entering mode

- 1. Turn off the power switch.
- 2. Turn on the power switch while pressing the  $\begin{pmatrix} A \\ UP \end{pmatrix}$  button.
- 3. When the display shows [ ] | , the station is in parameter entering mode.

#### A. °C or °F temperature display selection

- 1. Either for F will be displayed if you press the ENTER button when I is displayed.
- 2.  $\square$  and  $\square$  will be switched alternately If you press the  $(\square)$  button.
- 3. The display will return to [] | if you press the (INTER) button after selecting.

#### B. Low temperature error setting

- 1. Press the  $(\widehat{UP})$  button to change the display to  $\boxed{2}$
- 2. The low-limit temperature will be displayed if you press the (ENTER) button. Enter the value in the same manner as described in the normal mode [5. OPERATION The normal mode]
- 3. The display will return to [] ] if you press the ENTER button after setting.

2. If you press the (BNTER) button, the display will move to the setting mode selection screen. If you press

the (A) button, (The normal mode) and (The preset mode) will be switched alternately.

3. The display will return to [ ] if you press the ENTER button after selecting.\*

#### \* If you select the preset mode, the display will move to the preset selection screen.

- 4. The number of active preset will be displayed If you press the (ENTER) button at 3.
- (Example : If the number is three, 3P is displayed.)
- 5. Press the  $\begin{pmatrix} \land \\ \downarrow P \end{pmatrix}$  button to change the value and select the number of active preset you required.

## The unit will accept values from 2P through 5P.

6. The display will return to [ ] if you press the ENTER button after selecting.

# 2. If you press the ENTER L If you press the alternately 3. If you press the (ENTER) \*1 The display will me 4. If you press the ENTER to moving to the temper 5. Either 1 🚺 (without 6. If you press the ENTER needed when movir 7. Either 🔁 🚦 (witho 8. If you press the ENTE needed when movi 9. Either 🚽 👖 (withou 10. If you press the ENTE ☆2 If you select

ANCE
periodic maintenance extends product life. Efficient soldering depends upon
y and quantity of the solder and flux. vice procedure as dictated by the conditions of usage.
on can reach a very high temperature, please work carefully. Except the case lways turn the power switch OFF and disconnect the power plug before performing reduce

2. When the temperature stabilizes, clean the tip with the cleaning sponge and check the condition of the tip. 3. If the solder plated part of the tip is covered with black oxide, apply fresh solder containing flux, and clean the tip again. Repeat until all the oxide is removed, then coat the tip with fresh solder. 4. If the tip is deformed or heavily eroded, replace it with a new one

Do not file the tip in an attempt to remove the black oxide.

2. Using the cleaning wire

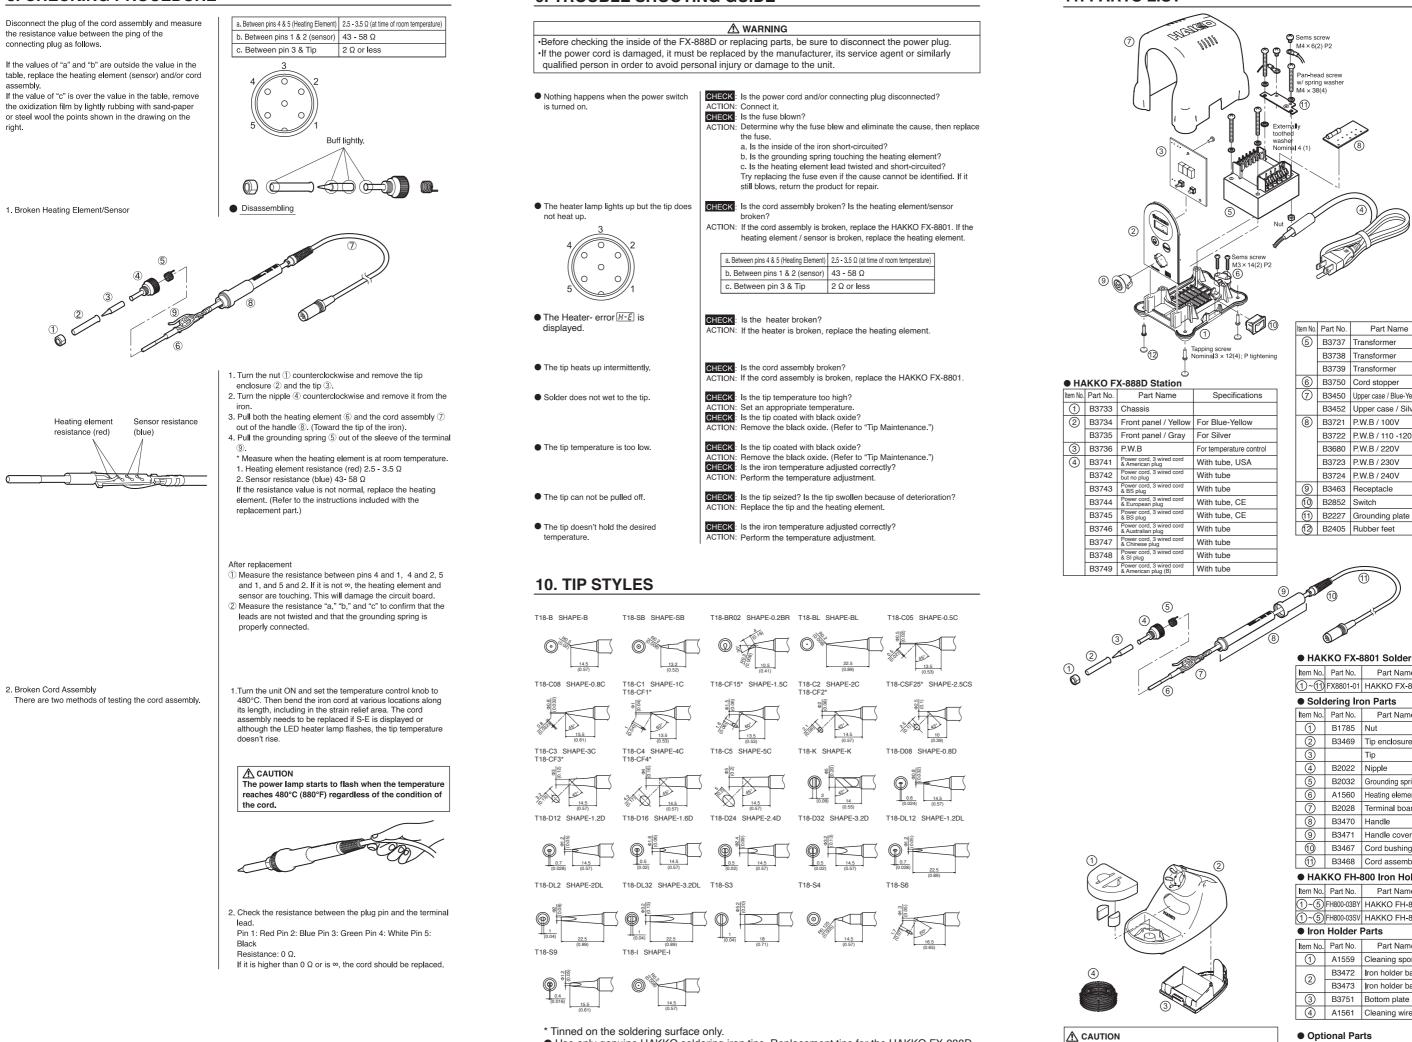

Use the cleaning sponge that comes with the product to clean the tip. It offers wide-ranging uses, from simple removal of excess solder to complete elimination of

Material that is not removed easily with the cleaning sponge can likely be removed using the cleaning wire

# 8. CHECKING PROCEDURE

# 9. TROUBLE SHOOTING GUIDE

• Use only genuine HAKKO soldering iron tips. Replacement tips for the HAKKO FX-888D are designated the T18 series.
