

HAKKO Installing the software

1 Software

- The contents of this manual are subject to change without notice.
- The specifications of this software are subject to change without notice due to improvements.
- Reproducing or copying this document, in whole or in part, is prohibited.

2 Trademarks

System names, product names, and service names on this document are generally registered trademarks or trademarks of their respective developers.

This document does not include TM, (R) marks.

3 Disclaimers

We will assume that, by downloading and installing this software, the customer has agreed to the following disclaimers.

- We will bear no responsibility for any claims for losses, lost earnings, or claims by third parties due to operation of this software.
- We will bear no responsibility for any problems that result through download and installation of this software.
- The company retains all property rights, ownership rights, intellectual property rights, etc. related to this software.

4 Installing the Software

- (1) Double-click the CD-ROM or the downloaded software.
File name: HAKKOControlSoftwareSetup X.X.X.X.exe
- (2) Select the language and click [OK].
- (3) After checking the License Agreement, select [I accept the agreement] and click [Next].

Figure 1-1

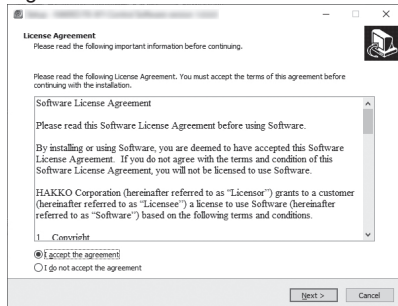

Figure 1-2

- (4) From here, follow the instructions on the screen.
- (5) The software will automatically launch when the installation is completed. (Figure 1-3)
- (6) Click [Exit] to exit the software. (Figure 1-4/1-5)

Figure 1-3

Figure 1-4

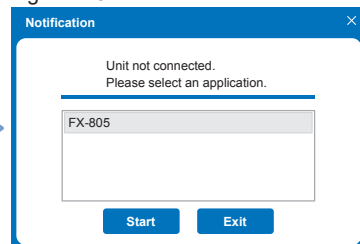

Figure 1-5

5 Connecting to a PC

- (1) Connect the product to a PC with the included USB cable.
- (2) Place the handpiece on the iron holder.
- (3) Connect the station and the handpiece.
- (4) Turn the station power switch ON.
- (5) Launch the software.

NOTE

If [- -] appears on the display even after the PC is connected as shown in the right figure, turn OFF the station power switch and then turn it ON again.

NOTE

Do not use a USB cable that is more than two meters long.

6 Software Updates

Follow the instructions below to download the latest software.

- (1) Go to [Customer Support > support and services > login and new user registration] on the HAKKO website.

https://www.hakko.com/doc_support-e

- (2) Log in, or create an account.
- (3) Click [My page (Product registration from here)] to register the product.

NOTE Product must be registered to download software.

- (4) Click [Download of Product Data] under the menu.

- (5) Select [Software] under the various resource search options.
- (6) Input the product name as the keyword.
- (7) Select the language and click [Search with these conditions].
- (8) Click [Download] in the search results.

1. Menu

File

- Port selection**
Used to manually select Port Number.
- Port search**
Used to autodetect port/reconnect station.
- Exit**
Used when exiting software.

Setting

- Language: Japanese/English/Chinese**
Select one of these languages.
- Display temperature unit: °C/°F**
Select the unit for temperature.

Management

- File storage location:**
Parameter setting file/
Automatic calibration result file/
Tip sensor temperature monitor file
Select where files are saved.
NOTE By default, files are saved in the same location as software folder.

- Tip sensor temperature monitor auto save: ON/OFF**
When set to [ON], the Tip sensor temperature will be recorded constantly and saved as CSV file.
NOTE Default is OFF.

- Tip sensor temperature monitor file split interval (minutes): 1 to 120**
Segments CSV files into multiple files based on minutes.
NOTE Default is 5 min.

Help

- Connection station version information**
Shows the station firmware version.
- Version information**

2. Initial Screen

The screenshot shows the main control interface. Callout 1 points to the station ID 'FX-805_001'. Callout 2 points to the tip type 'T37'. Callout 3 points to the preset temperature '3 350 °C'. Callout 4 points to the large digital display showing '350 °C'. Callout 5 points to the 'RUNNING' status bar. Callout 6 points to the 'Power' output mode. Callout 7 points to the '0 °C' offset value. Callout 8 points to the 'Tip sensor temperature [°C]' graph. Callout 9 points to the 'Auto save' checkbox. A box labeled 'See "1. Menu"' points to the menu bar. A box labeled 'See "3. Operation Buttons"' points to the bottom control buttons: Temperature Change, Tip Temperature Correction (Offset), Parameter Setting, and Automatic Calibration and Recorder.

1 Station name is displayed.
The station can be named in the Parameter Setting button under the section [Station ID].

2 The tip type in use is displayed.
The tip type will update automatically based on the tip.

The Setting Temp status is displayed.

- Manual inputing temperature displays [SET TEMP]
- Preset temperature displays [PRESET] and the preset number.

3 Station display shows '350 °C'. This can be done through the Temperature Change button.

Station display shows '350 °C' with 'P3' and '350'. You can change the Setting Temp manually or by selecting one of the preset temperature buttons.

The temperature registered for each preset number is displayed. The preset temperatures can be changed in the Parameter Setting button under [Temp Set Menu].

- Factory default setting temperatures:
No.1: 250°C (600°F)
No.2: 300°C (700°F)
No.3: 350°C (750°F)
No.4: 400°C (800°F)
No.5: 450°C (850°F)

The preset temperature selection status is shown by the button color.

Why are some buttons unselectable?
[Preset 5 ON/OFF] is set to [OFF] under the [Temp Set Menu] of the button.

The operating status of the station

- RUNNING**
Operating normally
- SLEEP**
Sleep state
- SHUT OFF**
Time specified in the ShutOff Menu has elapsed
- SENSOR ERROR**
Tip heating element/sensor not detected
- GRIP ERROR**
Inapplicable handpiece connected or the handpiece is disconnected
- NO CONNECTION**
Station is turned OFF or the station is not connected to the PC
- HEATERSHORT ERROR**
Inapplicable tip inserted
- ZEROCROSS ERROR**
Power supply abnormality or the main unit is damaged
- TIP DETECTION ERROR**
Inapplicable tip detected

- 6** The selected **output mode** is displayed.
The mode can be changed in the Parameter Setting button under [Output mode setting].
- The correction value (offset value)** is displayed.
7 The offset can be changed using the Tip Temperature Correction button or the Automatic Calibration and Recorder button.
- Displayed when **the parameter setting change is locked**.
8 This can be locked/unlocked in the Parameter Setting button under [Lock Menu].
- The tip sensor temperature** can be displayed on a graph.
- The graph data can be manually or automatically saved
Manually record: Pressing [Start record], pressing [Stop record] ends the recording
Recording with Auto save: files will be saved depending on the value inputted in [Tip sensor temperature monitor file split interval (minutes)].
 - Saved file name
During manual saving: FX-805TEMP_M_220101_093358.csv
During automatic saving: FX-805TEMP_220101_093358.csv
Date stamp of recording: January 1, 2022, 9:33:58
 - The graph "Time axis" and "Temperature axis" settings can be changed
Click button to display the Setting screen.

9

| Time axis default | | Temperature axis default | |
|--------------------------|------------|-------------------------------|-------------|
| Length of time displayed | 30 seconds | Maximum Temperature Displayed | 500°C/950°F |
| Time Scale Interval | 5 seconds | Minimum Temperature Displayed | 0°C/0°F |
| | | Temperature Scale Interval | 50°C/50°F |

See [Management] in "1. Menu" for the storage location and the auto save timing.

3. Operation Buttons

Temperature Change

- Change the set temperature
- If the temperature is changed here, the preset temperature selection is automatically canceled.

NOTE

Tip Temperature Correction (Offset)

(See "4-3. Operation" in the Instruction Manual)

- The tip temperature can be corrected with the following two methods.

NOTE

Manual input

- Measure the tip temperature
- Input the offset value
- Click the [Confirm] button
- Click the [Close] button

Using the HAKKO thermometer with the Temperature Sending Function

- Measure the tip temperature
- Send the measured temperature
- Click the [Confirm] button
- Click the [Close] button

Parameter Setting

(See "Quick Parameter Settings" in the Instruction Manual)

The current settings are highlighted in blue **A** and can be changed in the column to the right **B**. By click the [Confirm] button the buzzer will sound, and [Sys] or [Set] will display on the station to show the settings have been updated.

- The settings can be saved or loaded as CSV files. Click the [Save] button to store the settings from **B**. Default file name: FX-805-Parameter.csv

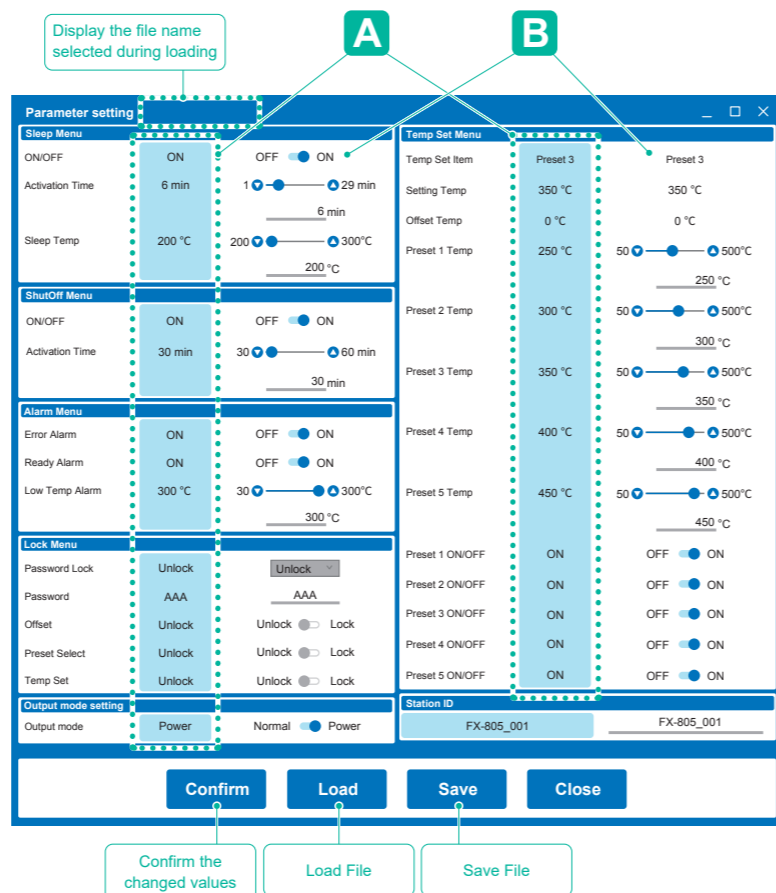

Click the [Load] button and select CSV file to input the settings, and then click [Confirm] to apply the settings.

* The file name is displayed in the upper left corner.

If the selected file name has an "*" "...

When the **B** values are changed after loading, "*" mark will be added at the end of the file name.
Example: FX-805-Parameter.csv*

| Parameter No. correspondence table | |
|------------------------------------|--------------------------------|
| Sleep Menu | Lock Menu |
| ON/OFF Parameter No. 07 | Parameter No. 14 |
| Activation Time Parameter No. 02 | Temp Set Menu |
| Sleep Temp Parameter No. 13 | Preset Temp Parameter No. 23 |
| ShutOff Menu | Preset ON/OFF Parameter No. 24 |
| ON/OFF Parameter No. 08 | Output Mode Setting |
| Activation Time Parameter No. 18 | Parameter No. 12 |
| Alarm Menu | |
| Error Alarm Parameter No. 05 | |
| Ready Alarm Parameter No. 06 | |
| Low Temp Alarm Parameter No. 03 | |

Automatic Calibration and Recorder

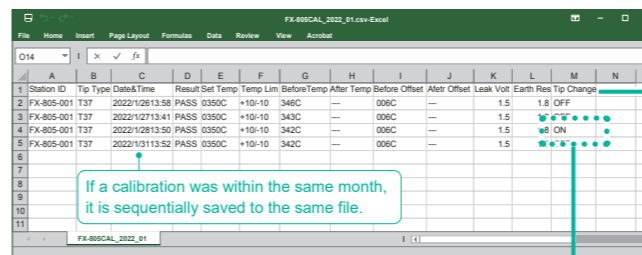

What is Automatic Calibration?

It is an operation to automate tip temperature management, and to save the proper calibration results.

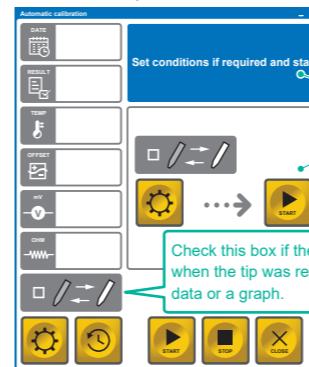

- Automatically saves the calibration results when the calibration is completed

- Compiles one month of saved calibration results in one CSV file

File name: FX-805CAL_2022_01.csv

Calibration procedure

- Set the conditions during Automatic calibration with the button.

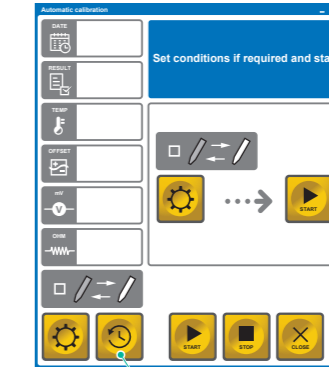

- Click the button and follow message **C** to calibrate. Set the conditions during

Calibration results

You may select one of the following search conditions.

- Date Search Specify the date for the period that you wish to check
- Number of histories Specify the recent histories that you wish to check

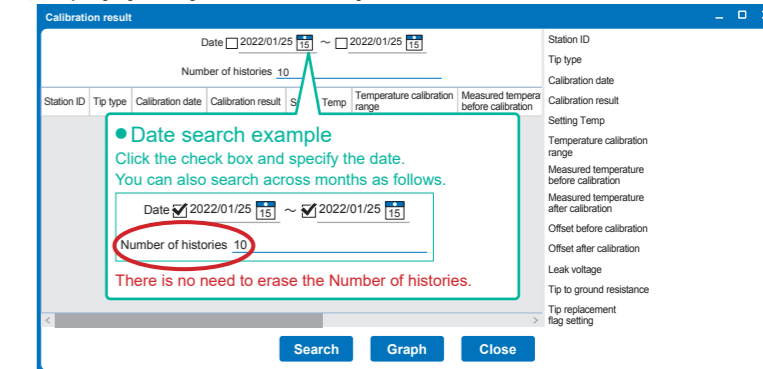

Procedure to display the calibration results

The following is an example for "History Search"

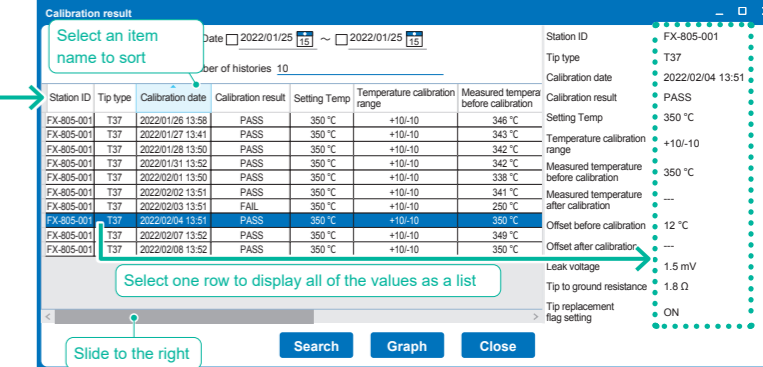

NOTE The calibration results can be displayed even if the station is turned OFF.

- Click the [Calibration results] button to display the screen to input the search conditions.
- Input [10] in the [Number of histories] bar.

- Click the [Search] button.

- The search results (latest 10 entries) are displayed.

- Click [Graph].

- The 10 search results are graphed.
