

I am Looking for a Desoldering gun for the Hakko 707 and was wondering if you knew the model/part number of that part so I could do search for a replacement.

The part number for the desoldering gun for a Hakko 707 Desoldering Station is 707B-1-V12. The Hakko 707 Desoldering Station has been discontinued for over 10 years and there are no replacement parts available.

Hakko can offer discounts on new Hakko products to existing Hakko customers that are looking to upgrade their older and/or discontinued products. For more information, please contact the American Hakko Regional Manager for your area. You can locate your American Hakko Regional Manager by checking the Sales Network page under the Contact Us menu on our web site.
