

What is the rating for the fan used in the Hakko FA-400?

The rating of the fan in the FA-400 is as follows:

Airflow: 95 to 115 CFM

Noise Level: 49dB

Speed: 3000 rpm

Note that the airflow rating of the fan is not the same as the airflow rating of the unit since the filter will reduce airflow. With a filter installed, the airflow is approximately 39 CFM.
